**The Nissan Armada is a full-size SUV**, one with masculine looks and an imposing stance wrapped around its roomy interior. But it's also a decade-old vehicle that hasn't kept the blistering pace of new utes like the latest Tahoe, Suburban and Yukon. The Armada's still good for towing and hauling, but it's expensive to fill up, and has lackluster fit and finish.

The Armada carries with it a kind of aging machismo that distinguishes it from more plain-Jane alternatives like the Chevy Tahoe or Ford Expedition. There's just something to its angled grille, rear door handles mounted in the pillars, and the arc of its roofline over the rear passengers. It's still well-organized inside, despite the fact that some of the buttons and plastics make it feel a little cheap by comparison to many of its competitors.

The 2008 Nissan Armada full-size SUV caters to those who need serious towing ability along with space to haul up to eight passengers. The sturdy full-size 2008 Nissan Armada is based on the Titan pickup, so it's built on a fully boxed truck frame. The 2008 Nissan Armada comes with a 317-horsepower, 5.6-liter V-8, fitted to a five-speed automatic transmission and offered with either rear- or four-wheel drive. The powertrain affords a class-leading towing capacity of up to 9,100 pounds and has the capability to drive on ethanol-blend fuel. With 385 pound-feet of torque, it can move the 5,300-pound Armada quite authoritatively, even with a full load of passengers, thanks to the very responsive five-speed automatic, which doesn't hesitate to downshift when needed. Fuel economy is a shameful 12 mpg in the city, which seems optimistic next to single-digit real-world results. *Nissan Armada 2008 Workshop Service Pdf Manual*
