

# Hyundai Tucson 2006 2007 2008 Workshop Service Repair Manual

A 140-horsepower 2.0-liter four-cylinder powerplant is basic in the GLS and also could own either the front or all 4 wheels by means of a five-speed handbook or optional four-speed transmission with manual-shift capacity. The SE as well as Minimal designs degrees consist of a 173-horsepower 2.7-liter V-6 that's readily available just with the automated transmission.
